PROJECTS

Death By Dagger

github.com/andrewegggleston/DeathByDagger

A fun game, updated for 2018. Made use of the **Slack API** to keep players updated on their status in the game. Created using **Go**, with data hosted on **PostgreSQL**.

Javascript Raytracing

github.com/andrewegggleston/javascript-raytracing

A small **p5.js** example created to demonstrate how raytracing can be used to make a depth effect when rendering images (as long as everything can be described as a straight line). Created during the design process of a two day hackathon.

WHS Planner

github.com/s0urc3d3v3l0pm3nt/whs_planner

A client application developed to provide students with a simple schedule planner and organizer. The application features an intuitive calendar, an automatically updating schedule, and a live news feed. The app was created using **Java**, with **JavaFX** as a graphical framework.

WORK EXPERIENCE

Northrop Grumman

Software Engineer

Created an employee management database. Gained experience in Java EE, Angular, and SQL.

📅 June 2019 - August 2019   📍 Baltimore, MD
